

Biteperk Cookie Policy

Cookies, local storage, analytics and marketing technologies

Version 2.1 | Effective 27 August 2026

This Cookie Policy explains the cookies and similar technologies used on Biteperk websites. The exact technologies may differ by regional site and may change as the website evolves. Non-essential technologies are used only in accordance with the consent controls shown on the site where consent is required.

1. What we mean by cookies and similar technologies

Cookies are small text files stored by a browser. Similar technologies include local storage, pixels and tags. Some are necessary for a site to work; others measure usage or advertising effectiveness.

2. Current categories

Category	Current use	Consent position
Strictly necessary	Browser/local-storage preferences such as theme and cookie choices; security tools such as anti-spam/verification where deployed.	Always active where strictly necessary.
Analytics	Plausible privacy-first analytics may be used to understand aggregate visits and useful links. It is configured as cookieless analytics; regional site controls may still allow users to disable analytics.	Used in accordance with regional configuration and applicable consent requirements.
Marketing	Marketing measurement such as the LinkedIn Insight Tag and, where configured, Google Ads measurement. These technologies may set or access third-party identifiers/cookies.	Not activated before the required consent is given. Users can withdraw through Cookie settings.

3. United Kingdom

For UK visitors, Biteperk seeks consent before storing or accessing non-essential information on a device where required by PECR and related UK privacy rules. Rejecting non-essential technologies does not prevent access to the core website. Consent can be withdrawn through Cookie settings.

4. Australia

For Australian visitors, information collected through analytics or marketing technologies is handled in accordance with the Privacy Policy and applicable Australian privacy/electronic-marketing requirements. Marketing technologies are controlled through the site's consent preferences.

5. Third-party providers

Third-party marketing platforms may process information under their own privacy terms and may act as independent controllers rather than Biteperk subprocessors. Current examples may include LinkedIn and Google where those tags are enabled. Plausible provides privacy-first website analytics.

6. Managing choices

You can use the Cookie settings control on the Biteperk website to accept, reject or change non-essential preferences. You can also use browser controls to delete or block cookies, although blocking strictly necessary storage may affect site functions.

7. Changes and contact

We update this Policy when technologies or legal requirements materially change. UK questions: sales@biteperk.com. Australian questions: hello@biteperk.com.au.
