

VoxTable Client Services Agreement

Sample document set SAMPLE-2026-08. Based on Biteperk AU public terms reviewed 2026-08-16.

SAMPLE ONLY. This document is a non-production reference draft for testing the VoxTable onboarding legal-document publication flow. It is not legal advice, not an executed agreement, and must be reviewed by qualified counsel before customer use.

1. Parties and authority

This sample agreement is between Biteperk Pty Ltd, trading as Biteperk, and the restaurant or hospitality venue that accepts the VoxTable onboarding order form. The person accepting confirms they are authorised to bind the venue. This mirrors the public Biteperk terms concept that business users must have authority to accept terms on behalf of their organisation.

2. Services

VoxTable provides an AI phone host for hospitality venues. The service can answer inbound calls, collect booking or order details, apply venue configuration such as opening hours and booking rules, and deliver records to the venue dashboard. Optional services such as VoxOrder or VoxConcierge apply only if selected in the onboarding order form.

3. Venue responsibilities

The venue is responsible for supplying accurate setup information, including menus, opening hours, booking rules, contact details, and instructions for common questions. The venue must review bookings and orders for operational accuracy and must not use the service unlawfully, deceptively, or to harass or impersonate others.

4. Caller disclosure and recording

The venue acknowledges that every VoxTable call must disclose that the caller is speaking with an AI assistant and that the call is recorded or transcribed. This disclosure is a core compliance control and cannot be disabled in this sample agreement.

5. Pricing and billing

Pricing, trial period, billing cadence, included services, and cancellation terms should be stated in the accepted order form or subscription checkout. The public Biteperk terms currently describe a simple monthly VoxTable price model, but production customer terms should use the current commercial offer presented during sign-up.

6. Data handling

Personal information and caller records are handled under the Privacy and Data Handling Schedule. The venue chooses retention and storage settings during onboarding. Biteperk will use venue and caller information only to operate, support, secure, and bill the selected services, unless another lawful basis applies.

7. Service availability and support

Biteperk will use reasonable care and skill to provide the service. Production terms should state any support channels, service levels, exclusions, maintenance rights, and incident notification process. This sample does not create any uptime commitment.

8. Liability and Australian Consumer Law

Nothing in this sample is intended to exclude guarantees, rights, or remedies that cannot be excluded under the Australian Consumer Law. Production terms should include an appropriately scaled limitation of liability for paid product use.

9. Suspension and termination

Biteperk may suspend access if the venue breaches acceptable-use obligations, payment obligations, or security requirements. The venue may stop using the service according to the cancellation terms in the order form or billing flow.

10. Governing law and contact

This sample uses New South Wales, Australia as the governing law reference, consistent with the public Biteperk AU terms. Questions should be sent to hello@biteperk.com.au.
